Trainee Learning Path: Phase 1

Nov 1, 2026 · @Krunal

A self-paced path. Finish one skill, show your trainer its "Done when" result, then start the next. English runs alongside everything.

English (30 minutes every day)

- [ ] LearnEnglish level test (British Council). Take it now and again at the end.
- [ ] BBC Learning English courses. 15–20 min a day, at your test level.
- [ ] 6 Minute English (BBC Learning English podcast). 6 min a day.
- [ ] Technical Writing One (Google). About 4.5 h, once you feel comfortable.

Habit: write commits, PRs and prompts in English yourself, then ask Claude to correct them and explain your three biggest mistakes.

Done when: your retest shows progress, and you've sent your trainer a five-line update in English every week.

Phase 1: Foundations

1. GitHub

- [ ] Git and GitHub for Beginners, Crash Course (freeCodeCamp). 1 h video.
- [ ] Introduction to GitHub (GitHub Skills). Under 1 h.
- [ ] Review pull requests, Resolve merge conflicts, Hello GitHub Actions (GitHub Skills). About 1 h each.

Done when: you have a repo with branches, three merged PRs, one review comment answered with a new commit, and a GitHub Actions check.

2. Figma

- [ ] Figma Design for beginners (Figma). About 3 h.
- [ ] Export formats and settings (Figma). 15 min.
- [ ] Figma for Developers (Steve Kinney). 2–3 h.
- [ ] Figma Dev Mode Is Here (Kevin Powell). 20 min.

Done when: you've designed a playable's start, gameplay and end card screens at 540×960 and exported its sprites as 2x PNGs.

3. Browser DevTools and JavaScript gaps

- [ ] Chrome DevTools overview (Chrome for Developers). 1–2 h.
- [ ] The Modern JavaScript Tutorial, only the chapters on `this`, closures, classes, modules, timers, the event loop and browser events. 4–6 h.

Done when: you can explain why a callback loses `this`, and find the slowest frame in a Performance trace of one of your Phaser games.

4. Animation and game feel

- [ ] 12 Principles of Animation (AlanBeckerTutorials). 24 min.
- [ ] Easing Functions Cheat Sheet. Keep it open while you work.
- [ ] Juice it or lose it (Jonasson and Purho). 15 min.
- [ ] The Art of Screenshake (Jan Willem Nijman). 45 min.
- [ ] Secrets of Game Feel and Juice (Game Maker's Toolkit). 10 min.

Done when: your juice journal has 10 effects spotted in apps or games, each with a line on why it works.

5. UI design

- [ ] 7 Rules for Creating Gorgeous UI (Erik Kennedy). 45 min.
- [ ] Laws of UX (Jon Yablonski). 30 min.
- [ ] Game UI Database. Browse for reference.

Done when: you've redesigned a real playable's end card in Figma using three of the 7 rules.
